

```

1
2 /-----
3 //single-databases.php (copy of single.php) code edit:
4 /-----
5
6 <?php while ( have_posts() ) : the_post(); ?>
7
8             <?php get_template_part( 'content', 'databases' ); ?>
9 /-----
10 //content-databases.php (copy of content-single.php) code snippet to include:
11 /-----
12
13 <div class="taxonomies">
14
15             <div class="topic">
16                 <?php echo get_the_term_list ( $post->ID, 'topic', 'Topic: '
17             </div>
18
19             <div class="organization">
20                 <?php echo get_the_term_list ( $post->ID, 'organization', 'Organizat
21             </div>
22
23             <div class="restriction">
24                 <?php echo get_the_term_list ( $post->ID, 'restriction', 'Access Res
25             </div>
26
27
28         </div>
29
30 /-----
31 //taxonomy.php (copy of archive.php) code snippet to include:
32 /-----
33
34 copy archive.php code and copy and paste it into a new file named: taxonomy.php
35
36 edit the comments
37
38 change the H1 code to grab the taxonomy name:
39
40         <header class="page-header">
41             <h1 class="page-title">
42                 <?php
43                 $current_term = get_queried_object ();
44                 $taxonomy = get_taxonomy($current_term->taxonomy);
45                 echo $taxonomy->label . ': ' . $current_term->name;
46                 ?>
47             </h1>
48
49 /-----
50 //content.php (copy of content.php) code snippet to include:
51 /-----
52 <?php
53     if ( 'databases' == get_post_type() ) { ?>
54         <div class="taxonomies">
55
56             <div class="topic">
57                 <?php echo get_the_term_list ( $post->ID, 'topic', 'Topic: '
58             </div>
59
60             <div class="organization">
61                 <?php echo get_the_term_list ( $post->ID, 'organization', 'Organizat
62             </div>
63
64             <div class="restriction">

```

```

65             <?php echo get_the_term_list ( $post->ID, 'restriction', 'Access Res
66             </div>
67     <?php } ?>
68
69             </div>
70
71             also add so external_url function works:
72
73             <header class="entry-header">
74     <h2 class="entry-title">
75             <?php print_post_title() ?>
76
77     </h2><!-- .entry-title -->
78
79     /-----
80     //archive-database.php (copy of archive.php or index.php) code snippet to include:
81     /-----
82
83     Copy all of archive.php but change header info (h1)  to include All Databases:
84
85     option to include list of taxonomy topics:
86
87             <header class="page-header">
88                 <h3 class="page-title">
89                     Topics:
90 </h3>
91
92             <?php
93 //list terms in a given taxonomy
94 $taxonomy = 'topic';
95 $tax_terms = get_terms($taxonomy);
96 ?>
97 <ul><h6>
98 <?php
99 foreach ($tax_terms as $tax_term) {
100 echo ' ' . '<a href="' . esc_attr(get_term_link($tax_term, $taxonomy)) . '" title="' . sprintf( __( "
101 }
102 ?>
103 </h6></ul>
104 <h1>
105             All Databases (A-Z)
106 </h1>
107
108     /-----
109     //functions.php (blank file with header info from functions.php in parent) code snippet to include:
110     /-----
111     /* Direct Database Title to External URL */
112     function print_post_title() {
113     global $post;
114     $thePostID = $post->ID;
115     $post_id = get_post($thePostID);
116     $title = $post_id->post_title;
117     $perm = get_permalink($post_id);
118     $post_keys = array(); $post_val = array();
119     $post_keys = get_post_custom_keys($thePostID);
120
121     if (!empty($post_keys)) {
122     foreach ($post_keys as $pkey) {
123     if ($pkey=='external_url') {
124     $post_val = get_post_custom_values($pkey);
125     }
126     }
127     if (empty($post_val)) {
128     $link = $perm;

```

```
129     } else {
130     $link = $post_val[0];
131     }
132     } else {
133     $link = $perm;
134     }
135     echo '<h2><a href="'. $link. '" rel="bookmark" title="'. $title. '">'. $title. '</a></h2>';
136     }
137
138     // Order custom post types alphabetically
139     function owd_post_order( $query ) {
140         if ( $query->is_post_type_archive('databases') && $query->is_main_query() ) {
141             $query->set( 'orderby', 'title' );
142             $query->set( 'order', 'ASC' );
143         }
144     }
145     add_action( 'pre_get_posts', 'owd_post_order' );
146
